countries

An expertise in formal and  
nonformal education

The PITCHER project consists of the design and test of open educational resources focusing on improving school teachers' and educators' capacity in preparing new learning experiences to support the fight against looting and illicit trafficking of cultural goods. To do so, the project relies on the expertise of a unique partnership which gathers European cultural organisations, police forces and schools which will design the resources together.

# PROJECT ACTIVITIES

## Methodology and framework

Nov. 2021 – Oct. 2022

The project will build a common framework and work methodology by analysing existing good practices and initiatives in Europe, identifying the needs of teachers and educators regarding the topic of illicit trafficking.

## Development and test of Open Educational Resources

Nov. 2022 – July 2024

Based on the first step, the project will develop Open Educational Resources for teachers and educators to use in order to raise awareness on the topic. They will be tested with partner schools and targeted stakeholders.

## Modelling and recommendations

Apr. 2024 – Oct. 2024

The project will deliver a model of intervention and a series of guidelines and recommendations for drafting a document paving the way to amass use of the training model and resources at the local, regional, or national level.

## FROM NETCHER (H2020) ... TO PITCHER

PITCHER builds on the final recommendations of the European project NETCHER (H2020 - 2019-2021) coordinated by CNRS, which implemented a strong trans-sectoral approach and recommendations on the fight against looting and trafficking of cultural goods. One of the components of the recommendations is the need for awareness-raising and guidance toward Educational communities.
